## Liebherr-Hausgeraete Ochsenhausen GmbH D-88416 Ochsenhausen

Refrigeration and/or Freezer System

## **Summary**

The invention concerns a refrigeration and/or freezer system with at least two refrigeration and/or freezer units, each having its own refrigeration component, with a common operating unit for a minimum of two refrigeration or freezer units, and with a signal transmission component for transmitting signals between the operating unit and the refrigeration or freezer unit in order to control the refrigeration or freezer units with the help of the operating unit.
